For a **FREE** competitive analysis of your current screening process!

SAVE MONEY

Rental History Reports will save you money, by reducing or even eliminating many of the costs associated with background screening. Here are just SOME of the ways we do this:

Easy Collections - Through our professional partnership with River Collection & Recovery Services, we offer online collections with no sign-up fees or out-of-pocket costs!

Criteria Stop Signs - Set custom screening criteria for potential applicants. Findings that fall outside of your parameters will stop the report - saving you up to 50% on applicants that fail your residency requirements.

Time = Money - By eliminating the redundancy of the traditional rental application and collections process, Rental History Reports save you money by allowing your employees to focus on other business matters, and letting US focus on accurate background screening.

SAVE TIME

Rental History Reports will save you valuable time, and make your life easier by integrating a custom screening solution to fit your needs. Here are just SOME of the ways we do this:

Online Applications - Our online application process ensures accurate information and saves the time and hassle involved with the traditional application process.

Automatic Lease Decisioning & Lease Generations - These take both the guesswork and the manual labor involved in lease decisions and generating lease paperwork.

Management Software Integration - No more manual entry! Our software seamlessly integrates to work with the most popular management software on the market today.

License and Credit Card Scanner - Stop the redundancy of manually retyping in applicant information. Simply scan their driver's license instead. Accepts credit cards too!
